L. Robert Lake

US CODEX office-Rm 4861 S. Bldg. Washington, DC 20250-3700

Dear Sir: I understand CODEX meets next week in Canada to vote on issues. It has been brought to my attention by Mr. Robert Cohen-Antidairy Coalition that genetically engineered foods are not currently being labeled as such. I feel as a citizen of the US, I have a right to know the content of any food I purchase. I prefer to have wholesome food and not something chemically engineered. My health is too important to me! I live on a fixed income and cannot afford to get sick. Will social security care for those who get diseases due to some mistake?

I do not wish to put something unknowingly into my body that will cause diabetes or alzheimer's. Labeling will help me and others to make a decision. For the sake of American families and our future, don't let this slip by--vote AGAINST genetically engineered food. Our farmers can grow what is necessary for our nation and More! Give us a break!!!

Sincerely, Max
